Profile

Final-year Computer Science student with a strong focus on cloud computing, DevOps and software developemnt. Through academic and personal projects I've gained hands-on experience with object-oriented programming, databases, and building desktop and web applications, providing a solid foundation in coding.

I enjoy exploring new technologies and continuously improving my skills. Therefore, my goal is to apply the knowledge I gained on real-world projects and grow into a confident IT professional.

Key Skills: Python • SQL • AWS Cloud • Java • Linux • Git • DevOps Fundamentals

Employment History

Cloud, Containers and DevOps - Summer Practice at **IBM**

July 2025 - August 2025

The project focused on modern DevOps principles, cloud computing, application containerization and automatic deployment. Diving into the following topics:

- Operating system: Linux
- Containerization: Docker
- Container orchestration: Kubernetes
- CI/CD: Jenkins
- Version control system: Git
- Cloud: IBM Cloud
- Red Hat

Customer Service Advisor with German at **Tech Mahindra, Timişoara**

November 2023 - November 2024

First point of contact for customer questions, requests, and issues related to online shopping orders. Provide support by understanding customer needs and offering accurate solutions based on the defined procedures and guidelines. Handle incident reporting and escalations to ensure that the requests are clearly communicated to the proper department.

Education

Bachelor's Degree at **Faculty of Mathematics and Informatics, West University of Timişoara, Romania**

October 2023 - Present

- Programming Languages (Python, C/C++, Java)
- OOP concepts
- Web Design
- Databases
- Operating Systems
- Web Technologies
- LaTeX

Worked on several academic projects such as a Travel Blog website (Django, Python), Banking desktop application (tkinter,Python,SQL) and implemented the user registration and login system, including email notifications, for a Java-based web application.

Licenses & certifications

AWS Certified Cloud Practitioner at **Amazon Web Services (AWS)**

Issued October 2025

Credential ID: fea332f0-0fd6-4153-becd-e36830854982

- Gained foundational knowledge of AWS Cloud concepts, architecture principles, and core services such as IAM, EC2, S3 and Lambda
- Developed understanding of AWS global infrastructure, regions, and deployment models
- Learned best practices in cloud security, compliance, and cost optimization
- Acquired familiarity with AWS billing, pricing structures, and support plans

Python Programming at **IT School**

January 2024 - July 2024

Certificate No. ITSGO1223PY3105

6-month course focusing on Python programming alongside Git, SQL and Django. Covered topics include Object oriented programming, file processing, databases and HTTP APIs.

Final project:
Banky desktop application built in Python using Tkinter for the graphical user interface and SQLite for data storage. Key features include account creation and management, transaction history, exchange funds in all globally available exchange rates, internal and external transfers, email notifications.
